CANADIAN JOURNAL OF ANIMAL SCIENCE

VOLUME 37 - 40

June 1957 - December 1957 - 60

EDITED BY THE
AGRICULTURAL INSTITUTE OF CANADA
OTTAWA, CANADA

Published twice yearly by the authority of the
Chairman of the National Committee on Agricultural Services

SUBJECT INDEX TO VOLUME 37

PAGE

Alberta butterfat, Seasonal and regional variations in the unsaturated acids of.... 1
Animals, A simple respirometer for small..... 68

Beef cattle, The effect of concentrate to hay ratio and other ration factors on the feedlot performance of..... 50
Buffalo cows under normal conditions, Studies on the body temperature and respiration rate of..... 130
Bulls, Intra-testicular temperature and fertility of bison, Cattalo and Hereford yearling..... 14
Butterfat, Seasonal and regional variations in the unsaturated acids of Alberta.... 1

Calves, The endogenous urinary and metabolic fecal nitrogen excretions of newborn 152
Calves, The protein and energy requirements of young dairy..... 157
Cattle grub, Observations on the seasonal development of hypodermal larvae of the northern..... 114
Cattle, Various combinations of grass silage and hay for dairy..... 64
Chickens, Variability in the nutritive value of fish meals for growing..... 58
Chromic acid on its fecal excretion pattern by grazing cattle, Effect of frequency of administration of..... 90
Chromic oxide pellet to provide uniform release of this indicator in the rumen of cattle, Note on a..... 185

Dairy cattle, Various combinations of grass silage and hay for..... 64
Dairy herds, Production studies on Experimental Farms:
1. Age correction of 180-day milk yield..... 123

Editorial policy and practice, Statement of..... 186
Egg production experiments, Experimental errors in..... 143
Ethylenediamine dihydriodide, Note on LD_{50} for sheep of..... 121

Fecal excretion pattern by grazing cattle, Effect of frequency of administration of chromic oxide on its..... 90
Fecal nitrogen excretion of the pig as influenced by the amount of fibre in the ration and by body weight, The metabolic..... 95
Fecal nitrogen excretion of the pig as influenced by the type of fibre in the ration and by body weight, The metabolic..... 106
Feces of cattle and sheep, A method for the extraction of pigments (chromogens) from..... 136
Feedlot performance of beef cattle, The effect of concentrate to hay ratio and other ration factors on the..... 50
Fish meals of growing chickens, Variability in the nutritive value of..... 58

Genotype-environment interaction in swine, Observations on..... 179
Grass silage and hay for dairy cattle, Various combinations of..... 64
Growth depressing factors in rapeseed oilmeal:
II. Studies on counteraction by dietary supplements..... 21
III. Studies on counteraction by steam processing, extraction and dietary supplements..... 31
IV. Comparative feeding values of Argentine and Polish types and the effects of supplementary aureomycin, fishmeal, lysine, iodide and thyroid-active substances..... 43

PAGE

Intra-testicular temperature and fertility of bison, Cattalo and Hereford yearling bulls 14

Milk yield, Age correction of 180-day 123

Nutrient requirements for Canadian Yorkshire Swine:
1. A study of the U.S. N.R.C. (1953) standards 79

Pig as influenced by the amount of fibre in the ration and by body weight, The metabolic fecal nitrogen excretion of the 95

Pig as influenced by the type of fibre in the ration and by body weight, The metabolic fecal nitrogen excretion of the 106

Poultry tests, Studies on the design of comparative:
1. A comparison of three strains of White Leghorns housed in replicated 50-bird pens and intermingled in a large pen 168

Rapeseed oilmeal, Growth depressing factors in:
II. Studies on counteraction by dietary supplements 21
III. Studies on counteraction by steam processing, extraction and dietary supplements 31
IV. Comparative feeding values of Argentine and Polish types and the effects of supplementary aureomycin, fishmeal, lysine, iodide and thyroid-active substances 43

Respirometer for small animals, A simple 68

Sheep ked on mature ewes and young lambs, Evaluation of methods of estimating populations of the 8

Sheep of ethylenediamine dihydriodide, Note on LD_{50} for 121

Shropshires, Open- vs. close-faced 73

Swine, Nutrient requirements for Canadian Yorkshire:
1. A study of the U.S. N.R.C. (1953) standards 79

Swine, Observations on genotype-environment interaction in 179
